

# Sehit Degirmenci

I design and ship production software: a marketplace, a calling platform with AI call review, and agents that handle real work.

---

## Selected systems

- 01 **Modestly.** 270,000 lines of C#, TypeScript and SQL: a multi-vendor marketplace on .NET, PostgreSQL and Stripe Connect.
  - 02 **Nordic Engine.** 125,000 lines of TypeScript and SQL: a multi-tenant CRM and AI calling platform on Next.js and Supabase.
  - 03 **Construction operations system.** 41,000 lines of TypeScript: an operations platform on Express, PostgreSQL and React for a construction firm.
  - 04 **Jello.** 52,000 lines of Python and TypeScript: an AI shopping agent that lives inside iMessage and WhatsApp.
  - 05 **ChatBot Skriv.** 28,000 lines of TypeScript: a Chrome extension that makes AI text in Google Docs look exactly like a person typed and formatted it.
  - 06 **Dojo.** A Cloudflare Worker and D1 app in plain JavaScript, no framework and no build step, that grades answers with a language model.
- 

## Stack

TypeScript, C#/.NET, Python, React, Next.js, PostgreSQL, SQLite, Cloudflare Workers
